

Standup for Safety Week

May 4 - 10, 2008

Accident season is upon us! Statistics show that most accidents occur in the Spring and Summer months. The FAA Safety Team (FAASTeam) is reaching out to prevent those accidents by encouraging ALL pilots to attend a seminar during Standup for Safety Week. Bring a friend or pilot with you. We are particularly interested in reaching out to pilots who have not attended a seminar or do not actively participate in recurrent training. Statistics indicate that those who regularly participate in recurrent training are less likely to be involved in accidents, incidents, and violations.

Tuesday, May 6 6:00 pm

Caribou Airport Terminal
